phosphoprotein phosphatase (BC 3.1.3.16) PP1 - kidney bean
C;Species: Phaseolus vulgaris (kidney bean)
C;Date: 08-May-1995 #sequence revision 03-Nov-1995 #text_change 09-Jul-2004
C;Accession: $60053, $52371
R;Zimmerlin, A; Jupe, S.C.; Bolwell, G.P.
Plant Mol. Biol. 28, 363-368, 1995
A;Title: Molecular cloning of the cDNA encoding a stress-inducible protein phosphatase A;Reference number: $60053; MUID:95359396; PMID:7632908
A;Accession: $60053
A;Status: preliminary; nucleic acid sequence not shown; not compared with conceptual tr A;Molecule type: mRVA

A;Description: phosphoric monoester hydrolase
C;Superfamily: serine/threonine protein phosphatase; phosphoesterase core homology; phos
C;Keywords: iron; metalloprotein; phosphoric monoester hydrolase; serine/threonine-speci
E;17-276/Domain: phosphoprotein phosphatase homology <PPP>
F;45-113/Domain: phosphoprotein phosphatase homology <PEC>
F;45-113/Domain: phosphopsterase core homology <PEC>
F;51,53,79/Binding site: iron (Asp, His, His, His) #status predicted
E;79,111,161,235/Binding site: zinc (Asp, Asn, His, His) #status predicted
F;82,112,259/Active site: Asp, His, Tyr #status predicted
F;83,208/Binding site: substrate phosphate (Arg) #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      A;Accession: C41525

Note=No experimental confirmation available;
TISSUE SPECIFICITY: Expressed in the visual systems of
well as in the mushroom bodies of the central brain.
SIMILARITY: Belongs to the PPP phosphatase family.
SIMILARITY: Contains 3 BF-hand domains.
SIMILARITY: Contains 1 IQ domain.
